OBJECTIVE

Dedicated Computer Science student with hands-on experience in full-stack development. Passionate about applying strong coding skills, problem-solving abilities, and modern web technologies to create clean, scalable, and user-focused applications. Seeking an opportunity to contribute to innovative projects, collaborate with cross-functional teams, and grow as a full-stack developer in a dynamic, tech-driven environment.

SKILLS

- **Programming Languages:** Python,JavaScript.
- **Web Technologies:** HTML5, CSS3,JavaScript(ES6+).
- **Frontend Technologies:**React.js, Next.js.
- **Backend Technologies:** Node.js, Express.js.
- **Databases:** MySQL,MariaDB,MongoDB, PostgreSQL.
- **APIs & Architecture:** RESTful APIs,FastAPIs,Frappe,Client–Server Architecture.
- **Tools & Platforms:** Git, GitHub, VS Code,ERPNext
- **Cloud & DevOps:** Docker, Cloudinary, AWS (EC2, S3)

EDUCATION

VISVESHVARAYA TECHNOLOGICAL UNIVERSITY — **Bangalore, Karnataka**
Bachelor of Engineering, Major in computer science and Engineering — **2022 - 2026**
CGPA: 8.5

EXPERIENCE

Freelance Full Stack Developer (MERN Stack) — Self-Employed September — **2025 – Ongoing**

- Delivered 3 end-to-end MERN stack (MongoDB, Express.js, React.js, Node.js) web applications across domains like school management, real estate, and dental clinic systems
- Handled complete project lifecycle independently — including UI/UX design, REST API development, database modeling, client communication, and timely deployment

Software Engineer Intern— Data for Decisions Technology Solutions, HBR Layout, Bangalore **July 2026-Ongoing**

- Developed, tested, and maintained software features by collaborating with cross-functional teams, ensuring clean, efficient, and scalable code.
- Identified and resolved bugs, participated in code reviews, and contributed to improving application performance and overall software quality.

PROJECTS

ENTERPRISE TIMESHEET & RESOURCE MANAGEMENT HUB — **Sep 2026**
(Python, Frappe Framework, ERPNext, JavaScript, MariaDB, HTML, CSS, REST APIs)

- Built a weekly dashboard with hour tracking, leave integration, and submission monitoring.
- Implemented hierarchical approvals, bulk actions, notifications, rejection comments, and audit history.
- Developed Python hooks and scheduled jobs for task-hour synchronization, project closure, RBAC, and resource allocation.

CONSTRUCTION & REAL ESTATE SERVICE WEBSITE — **Aug 2025**
(React, JavaScript, CSS, Node.js, Express, MongoDB)

- Developed a full-stack web platform for construction, renovation, and real-estate services
- Implemented property listings, service booking, and inquiry management system
- Designed responsive UI using CSS and JavaScript for browsing properties and requesting quotations
- Integrated analytics and geo-map dashboard for user activity and location-based insights
